### OBJECTIVE:

In my next career phase, I am interested in leveraging my in-depth, hands-on experience and training (gained in the military) in automotive service and repair industry. I am actively seeking a position as a technician in an auto dealership.

### STRENGTHS:

- Diagnostic inspections of engines, transmissions, transfer cases, steering and braking components, alternators, starters and radiators.
- Troubleshooting to include tear down and replacement of major sub-assemblies and components such as fuel pumps, radiators, alternators, transfer cases, transmissions and differentials.

### WORK EXPERIENCE:

#### **01/10/2009-05/30/2010, Wheeled Vehicle Mechanic, Ft. Huachuca, AZ**

*Squad Leader of Quick Fix section* - Performed organizational and direct support maintenance inspections on various types of military vehicles, power support and material handling equipment.

#### **09/28/2007-12/05/2008, Wheeled Vehicle Mechanic, Baghdad, Iraq.**

*Shop Foreman* - Provided a safe, effective, high moral and productive work environment in a combat zone. Assigned work to soldiers and provided technical direction and assistance in accomplishing the task. Performed scheduled and unscheduled maintenance. Complied with all occupational safety and environmental regulations and policies unique to the operations of the motor pool.

#### **11/07/2005-09/28/2007, Wheeled Vehicle Mechanic, Mannheim, Germany.**

Performed all services on diesel engines/vehicles which included replacing all fluids, tire rotation, ball joint, pitman arm, idler arm, tie rod end and spider washer inspection, replacement of filters and final road test all done by following the technical manual of each assigned vehicle. Used test equipment to troubleshoot and diagnose problems on different vehicles.

#### **11/30/2004-11/07/2005, Wheeled Vehicle Mechanic, Baghdad, Iraq.**

Responsible for checking on quality of unit vehicles. Performed scheduled service on all equipment and assigned vehicles.

#### **08/10/2004-11/30/2004, Wheeled Vehicle Mechanic, Mannheim, Germany.**

Removed and replaced major components such as engines, transmissions, differentials, transfer cases, steering and braking systems. Replaced filters and fluids; repaired tires and added lubricants. On occasion fabricated vehicle mounts and harnesses. Performed minor body work, as required.
